

SVM (Storage Virtualization Manager)

by StoreAge Networking Technologies

Overview

Solution description

SVM serves as the key building block for creating highly effective SAN management solutions. The SVM provides for the virtualization of the entire SAN space enabling enterprises utilizing SAN architecture to efficiently manage and allocate their storage resources. It provides a central point of storage management for highly scalable SANs, maintaining the full fabric data transfer bandwidth. The SVM enables an easy migration from traditional SANs to fully virtualized environment with the resulting TCO benefits.

Business problem

- Storage capacity utilization - SAN management - Backup - Performance - Vendor lock-in - TCO - Disaster Recovery

SVM (Storage Virtualization Manager)

by StoreAge Networking Technologies

Series information: pSeries

You are looking at SVM (Storage Virtualization Manager) running on IBM eServer pSeries - Unix servers

pSeries solutions offer the flexibility and availability to handle your most mission-critical and data-intensive applications. pSeries solutions also deliver the performance and application versatility necessary to meet the dynamic requirements of today's e-infrastructure environments.

SVM (Storage Virtualization Manager) supports the following operating systems on pSeries

AIX 5L for POWER, AIX V4.3

SVM (Storage Virtualization Manager) supports the following application flexibilities on pSeries

Install can promote server consolidation, Install can use logical partitioning, Solution uses Linux

SMB IBM and Cisco Seminar

We'd like to invite you to attend an e-business on demand seminar from IBM and Cisco Systems. The seminar will take you through all the benefits and drivers an e-business infrastructure can deliver. We'll answer all your questions on our new technologies and demonstrate how they meet the increasing demands placed upon your business. By implementing e-business on demand processes for your supply chain management, customer service and support, Internet commerce, training and human resources, you will quickly see how a reliable, secure and scalable infrastructure can transform your business processes. You will also be able to see how some companies have already profited from ROI (return on investment) figures of several hundred percent from the deployment of our e-business solutions.

IBM xSeries 440 Specification Sheet

The new IBM eServer xSeries 440 is the flagship of the xSeries product line and the complete embodiment of Enterprise X-Architecture technology. The x440 brings revolutionary advancements to industry-standard I/O, memory and processors, as well as a "pay as you grow" approach to scalability. With the flexibility of this peerless new server design, you'll be able to consolidate and manage computing power according to your business and data protection needs--without the penalty of having to purchase headroom.

Solution Connection Legal

IBM e(logo)server Solution Connection (this System) has been developed as reference for IBM and third party application solutions.

The material presented here is based on information obtained from the software provider. No effort has been made to independently verify the accuracy of the information, including any information relating to the functions (including year 2000 compliance), quality, and performance of the provider's products or services as well as the availability date. The customer is responsible for determining whether any particular software provider's products or services are suitable for its own needs. Prices, specific hardware or software requirements and availability dates may be obtained by contacting the vendor. (In addition, the support provided may vary from vendor to vendor.) Individual suppliers should be contacted regarding such items as installation, support, education, documentation, maintenance and any other terms and conditions.

This System does not constitute an expressed or implied recommendation or endorsement by the industry or IBM of any particular product, service, company, or technology, but is intended simply as an information guide that will give a better understanding of the options available to you. The fact that a company does not appear in this directory does not imply that it is inferior to those listed.

IBM does not assist customers in any way in the selection, review or acquisition of any non-IBM products, including those listed in this System. IBM takes no responsibility whatsoever with regard to the selection, performance, or use of the products listed in this system.

All understandings, agreements, or warranties must take place directly between the program suppliers and prospective users.

IBM MAKES NO WARRANTIES OF ANY KIND WITH RESPECT TO THE CONTENTS OF THIS SYSTEM, THE PRODUCTS LISTED HEREIN, OR THE COMPLETENESS OR ACCURACY OF THIS SYSTEM. IBM SPECIFICALLY DISCLAIMS ALL WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

This disclaimer does not apply in the United Kingdom or elsewhere if inconsistent with local law.
